# HELLO! I'M RYAN, A UX/UI DESIGNER.

## RECENT WORK EXPERIENCE

### **SALLIE** Senior UX Designer

07/23 - Current

At Sallie I am working with the team to establish our brand redesign into an evolving Figma library. Using an atomic design approach, we're creating individual assets, that when combined build on each other to allow full web pages to be created by dragging and dropping fully prototyped components onto the artboard. A personal focus of mine has been how to improve prospective students understanding of their loan and how it will affect their lives after college.

### **RAPID7** Senior Visual Designer

06/18 - 07/23

At Rapid7 I had a range of varied responsibilities. From the website, to printed reports, and video/animation projects. But I feel my greatest impacts have come through creating libraries and processes for myself and the team to improve consistency. Creating Indesign templates, Figma libraries, and managing our brand assets helped to create more consistency between our designers. Thus creating a more unified and impactful brand.

### **HASBRO** Design Consultant

03/17 - 03/18

At Hasbro I primarily created instruction sheets for the 2018-2019 calendar year of Transformers toys. This included over 100 products released during the course of my 1 year contract. Additionally, I lead the creative direction and instruction philosophy for the BotBots brand, and supported direction for Zoids. I also provided support to the Marvel team for their higher complexity projects.

## EDUCATION

### **B.S. in Graphic Design & Digital Media**

Johnson & Wales Univeristy

Magna Cum Laude

Concentration in Print Design

Concentration in Web Technologies

## SKILLS

### **Adobe CC**

XD  
Acrobat  
Indesign  
After Effects
